Dr. Scott Seidel Joins Shared Spectrum Company, Expands Technical Leadership

August 5, 2013 – Vienna, VA – Shared Spectrum Company (SSC), the leading innovator of dynamic spectrum access (DSA) and spectrum sharing solutions, announced that industry veteran Dr. Scott Seidel has joined the company as Deputy CTO.

“Scott is an expert and pioneer in the field of spectrum sharing and cognitive radio technology”, said SSC CEO, Thomas Stroup. “Having Scott join our technical leadership team broadens our ability to innovate and launch award winning products like the Spectrum Sensing Toolbox.”

Most recently, Dr. Seidel was Vice President, Systems Engineering at Powerwave Cognition. He has also served in senior technical positions at Raytheon, Teligent, and Telcordia Technologies. Dr. Seidel earned his Ph.D. in Electrical Engineering from Virginia Tech and has co-authored multiple wireless industry patents in the areas of DSA and mobile ad-hoc networks.

About Shared Spectrum Company

Founded in 2000, SSC is a leading developer of dynamic spectrum access and spectrum measurement technologies based in Vienna, Va. The company has developed innovative cognitive radio technologies for challenging wireless applications in a broad range of the frequency bands. SSC has devised and implemented pioneering solutions for many radio frequency receiver and dynamic spectrum sharing problems. The company is the recipient of numerous industry awards, including the 2012 Terman Award sponsored by the TechAmerica Foundation and the 2010 Wall Street Journal Technology Innovation Award. Information is available at www.sharedspectrum.com.
