

Shared Spectrum Company Co-Sponsoring 5G to XG US Defense Symposium

Vienna, VA – August 13, 2021 – Shared Spectrum Company, a leading innovator of spectrum intelligence software and solutions, is co-sponsoring the 5G to XG US Defense Symposium on Thursday September 23, 2021. The symposium, organized by InterDigital, will bring together leaders from across government, academia, industry and beyond to help address critical issues such as multi-network battle domains facing the DoD and to look at what is on the horizon for public and private sector collaboration in the 5G defense sector. 5G promises better connectivity, low latency and faster speeds than ever before which will give US defense forces a competitive edge.

SSC is heavily engaged in enabling DoD's 5G-to-XG vision through innovative system solutions built on over 20 years of technical innovation and working in partnership for developing and testing effective spectrum solutions.

The event is both live and virtual. The live event will take place at Halcyon House in Washington DC. More details about the symposium can be found on the event website.

About Shared Spectrum Company

SSC is a recognized leader in spectrum sharing technologies and solutions for DoD and commercial applications. They pioneered much of the early work on Dynamic Spectrum Access (DSA) and have continued to work across industry, academia, and government to identify and develop effective spectrum sharing policies, methods, and technologies for a host of spectrum bands and wireless systems.
